Help Keep Future Rates Low! Plus, Receive \$25

JOIN PPEC'S RADIO CONTROL SWITCH PROGRAM

Join PPEC's Radio Control Switch Program Today! A radio control switch (RCS) is a device that is installed on select air conditioning and electric water heater systems. At this time we are accepting water heater system applications. The purpose of the switch is to shut the system off remotely in order to conserve energy during peak times. Peak times (alerts) are typically triggered by extreme weather and last 2 to 4 hours. Many members, currently in the program, rarely notice when the control even occurs.

During peak alerts, electric utilities are charged more by their wholesale provider. In an effort to reduce cost, we invite our members to participate in our RCS program, which helps conserve energy and lower overall usage during peak times. By participating in this program, you receive a one time \$25 bill credit, plus you are taking an active role as a member to help keep rates affordable.

What Do You Receive?

- \$25.00 account credit

How Do You Sign Up?

1. Fill out the application located below and return with your bill. You may also go online at www.PPEC.coop
2. After receipt, the application will be scheduled in the order in which it was received. The member will be contacted to set an appointment for installation of the RCS.
3. Multiple switches can be installed on multiple appliances. Maximum of \$25.00 account credit per (household.)
4. Please allow 4-6 weeks for processing.
5. The RCS must remain operational for the life of the equipment.
6. The electric water heater must be a standard electric water heater and at least 50 gallons in size.
7. Applicable to Members who don't already have a previously installed switch.
